

# LIKE "ROS(E)A"

“ A rose is a woody perennial flowering plant of the genus *Rosa*, in the family Rosaceae.

Flowers vary in size and shape and are usually large and showy, in colours ranging from white through yellows and reds.

The name rose comes from French, itself from Latin ROSA.

# Wild Flowers

Wild flowers are herbaceous plants. This means that they lack a woody stem that remains above ground all year round. Instead, once they have flowered and shed their leaves, the stem withers and falls over, eventually getting mulched back into the soil.

There are three kinds of herbaceous plants: annuals, biennials and perennials. Annuals bloom and die in the space of a single season. In order to carry on their species to the next generation, they produce large quantities of seeds, which survive in the soil over winter.

For or dry seeds, for example in the case of annuals and herbs, they then grow from seed the following year. The difference between annuals and perennials is that perennials survive for more than one year. The perennials (like crocuses) grow back from below ground. Wild flowers disperse and germinate their seeds to give the next generation. Depending on their seeds, they can travel far away or stay close by. Some flowers, like dandelions, have seeds that can travel far away on the wind. Others, like poppies, have seeds that can travel far away on the wind. Some flowers, like dandelions, have seeds that can travel far away on the wind. Others, like poppies, have seeds that can travel far away on the wind.

5: Dandelion  
*Taraxacum officinale*  
Height: up to 30cm  
Fruiting head diameter: 2.5–7.5cm  
a) flower head b) unopened fruiting head c) fruiting head d) fruiting heads after seed dispersal by wind. One head has four remaining seeds and their 'parachutes'.  
Dandelions look like they have one, large yellow flower; but they actually have lots of very small flowers collected together into a composite flower head. Each single flower in a head is called a floret.

6: Common harebell  
*Campanula rotundifolia*  
Height: 10–30cm  
7: Japanese anemone  
*Anemone hupehensis*  
Height: 30cm–1m  
8: Montbretia  
*Crocasmia x crocosmiiflora*  
Height: 30cm–1m

9: Japanese anemone  
*Anemone hupehensis*  
Height: 30cm–1m
