PAINT PALETTE

COPENHAGEN

Copenhagen, a city filled with color from every direction you look. From freshly rainbow painted houses in Nyhavn, to the street art tucked away in every nook and cranny. Vintage shops line the streets with brightly colored 80's windbreakers and hand painted denim jackets sitting in the windows. Freshly bloomed cherry blossoms and flowers rest in the Tivoli gardens and your cheeks turn rosy red as you ride your bike around the city in the cold. Pure saturated colors inspire denim in cheerful candy color hues, much like the colors you see around the city when standing upon the Rundetaarn tower. A city with so much life and imagination generates an artisan mood felt from the graffiti on the walls to the architecture of the buildings. This influences denim with personalized hand painting motifs, embroidery's, and patches with an arts and craft kind of look. A city so happy how can one not smile from all the beauty and generosity it brings as it caresses you with a cheery hug.
